

## Transient Voltage Suppressors family

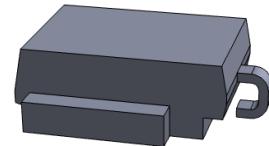

*Transient Voltage Suppressor (TVS) will effectively limit the transient voltage to a safe level. The YSM6Wxxx series has been designed to protect sensitive automotive circuits against surges defined in ISO7637-2/ISO16750-2 and against electrostatic discharges according ISO10605. The YSM6Wxxx series device could compatible with high-end circuits where low leakage current and high junction temperature are required to provide reliability and stability over time.*
